

Date: Thursday, 4th April, 2:30 pm

Members present:

- Vincent Zhang
- Hi Leung
- Louis Wang
- Yujia Zuo
- Hang Li
- Yifeng Zhang
- Jiahao Pang

What we did today:

- Make a Map Pin. Create a MapView in the layout and show the museum image button. (Yifeng)
- Add functionality AddItem and Delete Item for employee-manager (Hang)
 - Secure AddItem and Delete Item functionality by implementing authentication and authorization checks, such as checking user roles or permissions before allowing the user to perform these actions.

Task :

- Implement a function to detect if there is an intersection between a line and an edge on the map (Jiahao)
- Implement an Item List Display after clicking the search button (Yujia)
- Implement more functions to interact with Database
 - After the stuff add items or delete items, return to the Database
