Date: Saturday, 15th April, 2:30pm
Members present:
- Hi Leung
- Louis Wang
- Yujia Zuo
- Hang Li
- Yifeng Zhang
- Jiahao Pang
- Ziyuan Xu

We move the meeting time to Saturday to make sure everyone have time to review their exam.

What we did today:
- offline mode (disable the connection to database when offline)
- efficient consideration (user side and staff side)
- discuss on navigation function
- staff system

What we did last week:

Modify item list
- implement scrolling function
- image and text layout
- close when using map

Modify showcase
- react to the change in item list
- interaction upgrade
- set item layout for control activity and let control reuse the showcases loaded in main
- Control interface can interact with Pin, limited to remove items in showcase only

Following Tasks:

The Washroom and Exit button should be displayed and clickable.

There has an option to show or hide the pins of the showCase, pick one and make it done.

When there is no internet, the map should work well instead of crashing.

Navigation button to be displayed in the showCase list at left of the scrollView.

Improve the UI.
