- Louis Wang
- Yujia Zuo
- Hang Li
- Yifeng Zhang
- Jiahao Pang
- Ziyuan Xu

What we did today:

Upload everything we done to github and keep doing the task during the meeting.

Backlog:
Learn how to implement navigation functionality in Android Studio: Jiahao needs to learn how to implement navigation functionality within our Android application to improve the user experience and ensure that users are able to navigate through the application seamlessly.

Create a Staff Login System: The application currently does not have a staff login system, which poses a security risk and may result in unauthorized access to the application. Louis needs to create a secure login system for staff members to ensure that only authorized users can access the application.

Task:

Navigation function:
a. Research and learn how to implement navigation in Android Studio
b. Implement navigation functionality in the application
c. Test and verify that navigation functions as expected

Staff login system:
a. Design and implement a secure login system for employees
b. Test and verify that the login system is secure and only authorized users can access the application
